*Development of a Novel Soluble Epoxide Hydrolase Inhibitor as  
a Strategy for Treating Neuropathic Pain in Patients with a  
Spinal Cord Injury*

**Introduction:** We are recruiting for an AU Research Study being run by Dr. Laura Carbone at Augusta University in Augusta, Georgia, to see how safe and effective a new drug is to treat patients with neuropathic pain related to a spinal cord injury.

**Study description:**

- Looking for adults with a T6-T12 spinal cord injury whose pain meets study requirements, and who have failed at least 2 classes of medications to treat the pain.
- Participants in this study may see improvement in their neuropathic pain.
- Taking part in this study will last about 2 months including the screening period, with daily study visits for the first 15 days (including two separate 3-day stays in the hospital for close monitoring), followed by 5 more visits over the next 4 weeks.
- Participants will receive a stipend for each study visit they complete, up to a maximum of \$3540.00.
